

9_Bending_expansion_bow

We recommend an expansion bow each min. 50 meters.

9_Bending_expansion_bow

Stainless steel pipe expand 0,01 mm/°C.

100 meters of stainless steel pipe in areas with 30°C temperature difference gives $0,01 \times 100 \times 30 = 30$ mm length difference.

That is why you have to ensure the pipe can move freely in the direction you need.
